Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 September 2003.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the smooth continuous surface must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 recites the limitation "the lower surface" in line 4. There is insufficient antecedent basis for this limitation in the claim.

5. Claim 1 recites the limitation "the bridge portion" in line 4. There is insufficient antecedent basis for this limitation in the claim.

6. Regarding claims 1 and 5, the limitation of the continuous surface renders the claim indefinite since the drawings clearly show an aperture in the bridge portion of the glazing bead (Figure 17a). The Examiner is further unclear by the phrase "includes a

hollow underneath and uninterrupted below the lower surface the bridge portion", since the lower surface or bridge portion has not been clearly defined.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Owen Patent Number 3,196,998.

Owen '998 teaches all the limitations of the above claims including a glazing bead (75) made of pressed steel sheet material (column 2, lines 25-28 and column 5, lines 15-18) with u-shaped elongated legs (see Figure 7), short side (78), long side (77), smooth continuous surface bridge portion (76) with hollow underneath and uninterrupted below the lower surface (the surface opposite flange 82).

Response to Arguments

9. Applicant's arguments filed July 21, 2003 have been fully considered but they are not persuasive. The Examiner maintains that the Applicant fails to provide any support that the Owens '998 member cannot be made out of pressed steel. Since the Owens '998 reference teaches pressed steel, the Examiner has made a reasonable rejection based on the teaching. The Applicant argues that several aspects of the Owens '998 member make it impossible to form by rolling or pressing metal sheet stock. The Examiner would need evidence of such to overcome the teaching of the Owens '998

reference. The arguments about the hollow underneath and uninterrupted bridge portion are moot due to the 112 rejections of the claims.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
